

5 B's for Remote Learning

(Special thanks to the Bermensolo Family!)

BE RESPONSIBLE:

When working on the computer, focus on what needs to be done.

Stay on task, stay on schedule.

Don't get distracted by other programs or games.

BE WISE:

Work diligently on your tasks.

Put all your effort into each task you have to complete.

Practice, practice, practice.

BE SAFE:

Safely use your equipment.

Computers are expensive, handle them with care.

Chairs can tip over, sit on them properly.

Wash your hands often and avoid touching your face.

BE RESPECTFUL:

Respect our family's privacy while online.

Make sure people in the room are aware that you are on a video conference.

Group video meetings should be done in a family space like the dining room, living room or family room.

BE A GOOD NEIGHBOR:

Play safely with your siblings and help them out when asked.

When out of the house, keep social distance with others during this time.

Listen to others and don't interrupt.

We're all going through a lot of changes right now, be patient and supportive with your siblings, friends, and teachers.
