

Mrs. Watkins-6th Grade/Oct. 21-25, 2024

Math & Science

<u>Bible:</u> - Our class will do Ch.6 of Winning the Race curriculum, on Unit II - Inner Strength.

<u>Science:</u> Students will take a Science Test on Ch.10 & 11 about stars, craters, the sun, and the moon. Science tests are open notebook. <u>SCIENCE TEST #1 - Wednesday, Oct. 24th!</u> Then, we will switch to Health for two weeks.

<u>Math -Course 1:</u> Students will focus on divisibility rules for finding common factors as we explore how to add & subtract fractions with the same denominators or with different denominators. We'll look at Ratio & Rate, and work on reducing fractions.

Last week, we worked on measuring to the 16th of an inch - for many students it was a new skill. It would really help students to keep practicing this skill at home. Let them have a ruler or tape measure and ask them to measure different objects at home... a cookbook, phones/computers, furniture, and their personal items. It is important for them to write out measurements as mixed numbers (example 3-9/16 inch).

6th Grade still needs volunteers for the Ring Toss booth at the NCA FALL CARNIVAL on Nov. 1st.

*WATKINS HOMEROOM: PE is Tues./Thurs. and Friday.

6th Gr. News

Friday Folders:

Please remember to return the BLUE Friday Folders by Monday.

Congrats Happy Campers!!!

What a great response to our Fun Run Challenge! You pulled together to earn almost all of our Level-up Rewards for our class. Mrs. Watkins will provide pizza lunch on Monday for our homeroom.

Hooooraaay 6th grade!
