

# November

Mrs. Watkins 6th Grade/Nov. 11-Nov. 15, 2024

## This week

## 6th Gr. News

**Bible:** - We will finish learning about the Fruits of the Spirit in Galatians 5:22-23. Each lesson focuses on a person of interest who exhibits the characteristics of each fruit.

**Friday Folders:**  
Please remember to return the BLUE Friday Folders by Monday.

**Science:** We will wrap up learning about First Aid skills & Safety Prevention. Our next unit is Matter, Atoms, & Molecules.

**THANK YOU!!!**  
We truly appreciate the time Mr. Villena took to teach our students about CPR. Everyone enjoyed it and learned so much!

**Math -Course 1:** Students are still working with elapsed time as it relates to a clock and AM/PM. We are continuing to study the relationship between fractions written as percents, and the meaning of decimal place values. Flipping back & forth between fractions, percents, and decimals takes time & they are starting to understand the connection. Students will work with adding & subtracting decimal numbers.

**Grades and Assignments:**  
Student grades are posted in FACTS. Please check Google Classroom daily for homework assignments.

\*Math Homework - Our practice from each lesson will be increasing as we continue to build math stamina. Students will need to bring math books home to complete work, even though they don't like to carry them home.

## Dates to Remember
