

Curious Critters

WEDNESDAY APRIL
23RD

Curious Critter will be coming to visit us at NCP with 5 different animals for our students to learn about and interact with!

A bit about Curious Critters: Casai did a series of internships at various zoos in California, caring for animals, training animals, and teaching. This led to working for the San Francisco Zoo teaching traveling educational programs with a large variety of exotic animals, and loving it! From those vast and varied experiences, she knew that creating her own traveling zoo in order to teach kids about the environment was her calling. After years of learning about business, regulations, and other preparatory work, she started Curious Critters by Casai!
